Profile
Frontend Developer with 3 years of experience building scalable web applications using React.js and Next.js. Specialized in dashboards, admin panels, configuration-driven forms, and multi-tenant SaaS platforms. Proven ability to deliver complex features end to end, from requirements analysis to production, while collaborating closely with product managers and backend engineers to ensure reliable, maintainable, and business-aligned UI solutions.

Work Experience

Frontend developer

ComplyMarket company   June 2025 – till present

- Engineered a single, enterprise-grade system comprising approximately 20 modules, tailored for corporate clients with layered business rules and configuration-driven behavior.
- Structured the modules to separate responsibilities:
  - Super Admin modules for global system configuration, module management, and company-level setup
  - Company-specific modules for reporting, analytics, and operational workflows
- Designed adaptive, configuration-driven forms that update in real time based on business logic and user permissions, significantly reducing manual setup errors.
- Implemented role- and permission-based access control (RBAC) across all modules to ensure secure and appropriate access for Super Admins and company users.
- Produced reusable, scalable UI components aligned with enterprise standards, reducing duplicated code and improving long-term maintainability across all modules.
- Structured questionnaire logic within relevant modules around Groups, Packages, and Sets, enabling flexible data modeling and reuse across company workflows.
- Partnered closely with business stakeholders and enterprise users to clarify requirements and deliver intuitive, production-ready interfaces aligned with operational needs.
- Working in an Agile/Scrum environment using Jira, contributing to sprint planning, and performing rigorous peer code reviews to maintain high architectural standards.

Frontend developer

Smartivemedia company   March 2024 – May 2025

- Contributed to a multi-tenant SaaS platform provisioning each customer with a dedicated subdomain and customized dashboard.
- Built and scaled a React.js dashboard supporting daily business operations for multiple merchants.
- Architected authentication and authorization flows including login, registration, protected routes, and RBAC.
- Controlled access to dashboard features by enforcing role- and permission-based authorization rules.
- Delivered product management modules supporting:
  - Simple Products
  - Configurable Products
  - Food Products
- Unified the admin dashboard with a Next.js storefront to ensure consistent data synchronization.
- Created a centralized Settings module allowing users to manage business and platform preferences.
- Introduced a flexible Attributes system enabling dynamic product variations and custom attributes.
- Collaborated with backend engineers to align frontend behavior with API contracts and business logic.
- Maintained a reusable, component-based architecture that simplified feature expansion.

Project
E-commerce Website & Admin Dashboard Project
   Demo: Rose App
   Repo: Rose App

- Developed a full-featured e-commerce platform including authentication flows (login, registration, OTP verification, password reset), product catalog, cart, and order management.
- Built a scalable admin dashboard to manage products, orders, and user accounts with role-based access control (RBAC).

- Created dynamic product pages supporting configurable attributes and category-based variations.
- Applied Atomic Design methodology (Atoms, Molecules, Organisms, Templates) to structure UI components for scalability and maintainability.
- Developed reusable, component-driven UI components using React and Next.js, improving consistency across the platform.
- Ensured seamless integration with backend APIs to maintain real-time data synchronization and reliable frontend behavior.

Technical Skills

Frontend: React.js, Next.js, Redux Toolkit
State & Data: React Query, Zod, GraphQL
Styling & UI: Tailwind CSS, SASS, CSS-in-JS, Component-based architecture, Accessibility, Responsive Design
Auth & Security: Authentication & Authorization, RBAC, Protected Routes
API & Testing: REST APIs, GraphQL APIs, React Testing Library / Jest, Bruno (API testing)
Components & Documentation: Storybook (UI documentation & isolated testing)
Tools & Workflow: Git/GitHub, Agile/Scrum, Jira, ClickUp, Trello, Docker, Kubernetes

Soft Skills

Problem-solving: Effectively identifying and resolving technical challenges.
Communication: Clear and concise communication with cross-functional teams.
Adaptability: Quickly learning new technologies and adjusting to changing requirements.
Time Management: Efficiently prioritizing tasks to meet deadlines.
Collaboration / Teamwork: Working effectively in team environments.

Education

Bachelor's Degree in Computer and Information Systems   Graduated:2022

Graduated: 2022 Graduation Project: Sports Guide Web Application   Grade: **Excellent**
