PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience building enterprise SaaS applications using React, Next.js, and TypeScript. Specialized in building scalable, configuration-driven UIs, reusable component systems, and dynamic form engines integrated with REST and GraphQL APIs. Focused on performance, accessibility, responsive design, and RTL support, with strong experience in Agile environments.

PROFESSIONAL EXPERIENCE

Frontend Developer | ComplyMarket — ComplyMarket.cloud

May 2025 – Present | On-site | Alexandria, Egypt

Enterprise SaaS compliance platform (German company) covering 20+ specialized modules: Bill of Materials, Reporting, Questionnaire Management, Battery, Packaging, and Trade Compliance.

- **Architected a unified questionnaire engine** used across 12+ modules — built solo end-to-end, enabling any team member to integrate full questionnaire flows (paginated groups, conditional next-question logic, configurable inputs) without writing module-specific logic from scratch.
- **Refactored the Reporting module** eliminating redundant code patterns and aligning it with a consistent data-flow architecture — reducing maintenance overhead across all report types.
- **Built GenericRequirementsTable**, a single reusable component adopted across 7 AI-powered report types (Chemical, Cosmetics, Packaging, Electrical, etc.) — replacing what would have been 7 separate implementations.
- **Designed Figma UI** for the Compliance Requirements module covering Super Admin and Company-level workflows, bridging design and implementation without a dedicated designer.
- **Developed a Reporting Control Dashboard** allowing Super Admins to define per-company access limits (by date or usage count) for AI compliance reports — a critical business-control feature.
- Implemented RBAC permission system across all modules with protected routes and role-aware UI rendering, supporting multiple company tiers and user roles.
- Flagged and resolved business flow inconsistencies across modules, proposing UX improvements adopted by the team.

Frontend Developer | Smartivemedia — Dookan.com

Jan 2024 – Apr 2025 | Remote | Full-time

Multi-tenant e-commerce SaaS platform with a shared merchant dashboard, subdomain storefronts, and a customer-facing website. Worked as part of a cross-functional team with shared component ownership.

- **Led the Settings module** covering Branches, Language, Permissions, Email Notifications, and Design System while contributing shared components used by the entire team across the dashboard.
- **Built product management flows** for simple, configurable (variants/options), and food product types with full multi-language (i18n) support — handling complex state across deeply nested form structures.
- Implemented secure authentication and OTP verification flows, improving session security and user onboarding reliability.
- Worked within a large-scale shared component architecture: React, Redux Toolkit, React Query, MUI, Radix UI, Tailwind CSS, React Hook Form, Zod, Axios, React Router DOM.

PERSONAL PROJECTS

PeopleFlow — Multi-Tenant HR & Workforce Management Platform | Next.js · Node.js · Prisma · PostgreSQL · NextAuth

[Demo](#) | [Frontend Repo](#) | [Backend Repo](#)

- Built the platform end-to-end as a solo developer, covering frontend, backend APIs, database design, and authentication flows.
- Currently building a multi-tenant HR platform supporting companies, departments, employees, attendance tracking, and leave management workflows.
- Designed a relational PostgreSQL database architecture using Prisma ORM, covering company structures, employee hierarchies, attendance records, leave policies, leave balances, and approval workflows.
- Implemented authentication and authorization using NextAuth, JWT, refresh tokens, protected routes, and role-based access control (RBAC).
- Developed company, department, and employee management modules with support for Super Admin, Company Admin, Manager, and Employee roles.
- Building scalable REST APIs using Node.js and Prisma with reusable service layers and business-rule validation.

Rose — E-commerce App & Dashboard | Next.js · NextAuth.js · TypeScript · RBAC

[Demo](#) [Repo](#)

- Implemented RBAC-based dashboard workflows for managing products, orders, and content across multiple administrative views.
- Built a full-featured e-commerce storefront with product listings, categories, cart, and checkout flows.
- Implemented complete authentication system using NextAuth.js with protected routes and session management.
- Built a separate admin dashboard for product, order, and content management with role-based access control.

Vive Healthy Snacks — Full-Stack E-commerce | Next.js · Prisma ORM · PostgreSQL

[Demo](#) [Repo](#)

- Architected a full-stack e-commerce application using Next.js (App Router) and Prisma ORM with relational PostgreSQL models.
- Built responsive custom UI, product management workflows, and database schema design end-to-end as a solo developer.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js (App Router), Redux Toolkit, React Query (TanStack Query), Context API

Styling & UI: Tailwind CSS, SASS, CSS-in-JS, MUI (Material UI), Radix UI, Responsive Design, Accessibility

CMS & Config-driven UI: Configuration-driven component systems, editable templates, dynamic form engines

Forms & Validation: React Hook Form, Formik, Zod

APIs & Data: REST APIs, GraphQL, Axios, Prisma ORM, PostgreSQL

Auth & Security: NextAuth.js, RBAC, Protected Routes, OTP Flows, JWT

Testing & Docs: Jest, React Testing Library, Storybook, Bruno (API Testing)

Tools & Workflow: Git, GitHub, Jira, ClickUp, Trello, Figma, Agile/Scrum

Performance: Lazy loading, Skeleton states, Image optimization, Bundle awareness, Core Web Vitals

EDUCATION

Bachelor's Degree — Computer & Information Systems (IT Specialization)

Alexandria University — KMA Academy | Graduated 2022

Overall Grade: Good | Graduation Project Grade: Excellent

CERTIFICATIONS

- Online Career Directions Program — Education For Employment (EFE-Global) | Mar 2025
- 45-Hour Startup Development Training & Final Project — Innovegypt
- Professional Program in Front-End Web Development — Udacity | 2022
